

# ULTIMO SUBWOOFER

## Technology features

- 1. Octopus Grille**  
Innovative design to provide protection and maintain acoustic transparency.
- 2. One Piece Hybrid Cone**  
An integrated cone made from a composite of paper and carbon fiber for improved musicality, power handling and low distortion.
- 3. PFS™**  
Progression field symmetry engineering for longer linear excursion and optimized performance at high power output.
- 4. Black Aluminum Former**  
Thick and durable aluminum former with ultra high thermal limit properties for long-life performance.
- 5. External Voice Coil**  
A gigantic 5.1" voice coil for improved cone support and high power handling.
- 6. Accucenter™**  
Self-centering engineering for easy voice coil repair.
- 7. Hexatech Aluminum Voice Coil**  
For minimal loss of magnetic flux and low induction for improved efficiency.
- 8. Uniflow™**  
Aluminum die-cast chassis to eliminate unwanted vibration noise and for increased durability.
- 9. Cooling Duct**  
Enables air cooling circulation for thermally stable operation of the voice coil.
- 10. DMM™**  
Optimized and compact Double Magnet Motor that achieves 90% efficiency.
- 11. Magnet Cup enclosure**  
Heavy-duty enclosure, engineered to attach to the Uniflow™ chassis, enables quick and easy replacement of the magnet motor and cone coil assembly if necessary.
